

CAPABILITY STATEMENT

XBITECH CORPORATION

COMPANY PROFILE

OUR MISSION AND STRATEGY

To provide strategic business solutions and develop high-quality software and applications that increase organization productivity and profitability.

We provide solutions tailored to individual business needs. By combining our expertise in research and analysis, information technology and software development, we collaboratively offer a diverse range of complementing skills to businesses worldwide. Our team is customer-oriented, committed to client satisfaction and devoted to provide the highest quality of services to our clients.

ORGANIZATION

For nearly a decade, XBITech has provided the technological backbone supporting some of today's most demanding businesses. XBITech unites a team of experienced programmers adept in software, database design, and development. Our employees contribute their experience in their areas of study to support the project needs of our clients.

We emphasize a team environment by integrating management personnel into project activities within the team. We encourage our team members to work together, follow best practices and be responsive to clients' need to meet deadlines.

OUR CLIENTS

We work directly with clients on each project to ensure that we understand the clients' business needs and provide solutions based on our technical skills in several areas of specialization. Our focus is on more than just providing our clients with business solutions; we stress the importance of completing projects within budget, in a timely manner and to the satisfaction of our clients.

We'll manage the project, planning, integration and budgeting on our end and provide a guaranteed software solution that our clients can use in the projected time to run a smooth daily operation.

SERVICES

SOLUTIONS

We work hard to cultivate strong and professional relationships with our clients by offering guaranteed software solutions that businesses can use to increase team and organizational productivity and financial performance.

We meet our clients' needs and expectations by working closely with clients on long- and short-term projects to ensure that all phases of a project are executed efficiently and delivered to the client in a timely manner.

SOFTWARE DESIGN & STRATEGY

Our team of developers specialize in innovative design and follow new technological trends embraced by businesses and consumers. Businesses that require customized solutions and applications gain most from software and applications designed to fit their organization structure.

Our software and application solutions are designed to seamlessly integrate with a client's existing operating system and increase operational workflow. Our software knowledge includes:

- Application implementation services
- Application programming services
- Client or server programming services
- ERP or database applications programming services
- Internet or intranet server application development services
- Mainframe software applications design

SERVICES

BUSINESS INTELLIGENCE

As a Microsoft Small Business Partner, XBITEch implements business intelligence solutions that are scalable and designed to evolve with your business. The business intelligence solutions are built on open, industry-wide standards - making integration with other systems easier and less costly than the alternatives.

Microsoft business intelligence expands the reach of our clients' investments in the Microsoft productivity platform, data infrastructure and collaboration tools they already own. Our solution delivers business intelligence by integrating strengths of these products on a single platform to empower informed business decisions.

Microsoft business intelligence enables you to create and manage information through an integrated system that includes core business productivity features, such as collaboration tools, search capabilities, and content management. The workplace becomes highly efficient, resulting in cost savings and low total cost of ownership (TCO).

PRODUCTS & SOLUTIONS

XBITEch offers clients a competitive edge with products and services that meet the needs of their growing business. Real time data provides business owners and management teams the information needed to make informed decisions that impact the productivity and the direction of the organization. Products and solutions offered to our clients include:

Data Storage & Management	Information Delivery	Query, Reporting & Analysis	Included Products
Data Warehousing Ad-Hoc Analysis Data Quality Data Mining	Dashboards Collaboration/ Search Managed Reporting Visualization Scorecards	Ad-Hoc Analysis Production Reporting OLAP Analysis	SQL Server SharePoint Server Microsoft Office

SERVICES

WEBSITE DESIGN & DEVELOPMENT

A website is the face of our clients' organization and it takes exceptional web design and user-friendly tools to navigate and obtain the right information. Our design team create custom websites that help our clients find and retain customers, set them apart from the competition, deliver real ROI and get them back to running their business.

Our custom website design includes a content management system for easy maintenance and updates that can be made by the client, using user-friendly tools to those familiar with Microsoft Office products.

STAFF AUGMENTATION & RECRUITING

XBITech delivers staff augmentation services support and fulfills periodic and/or ongoing high caliber, qualified and experienced previously vetted staff augmentation candidates. Our IT candidates also meet all requirements involved in Nationwide Criminal Background Checks (RFP 2.5) and remit any/all national criminal history, fingerprints and photographs required by the Texas Department of Public Safety ("DPS") according to Section 411.0845 Code and our internal Program Management Office (PMO) standards.

We adheres to all applicable federal, state and local laws as well as those of our client's business practices, employment and benefits and our own industry standards in the highest regard. Therefore, our staff augmentation process reach back and expertise in recruitment, qualification mapping, requirement analysis, regulatory oversight and human capital architecture necessary in today's marketplace for our clients.

Referencing IT expressly, XBITech has managed staffing processes for many clients with quality reviews and high-end performance metrics:

- Interviewing and selecting individuals for contract assignments and direct placements
- Conducting skills assessments via applicant testing, interviews, etc.
- Conducting reference/background checks
- Recruiting experienced and qualified individuals for contract and direct placements
